Cost Aed 300

**BL34 STAINLESS STEEL COMMERCIAL ELECTRONIC JUICER
BEST FOR COMMERCIAL BUYERS**

**Cost is AED 3,700
Details are on the next page.**

IMPORTANT. PLEASE READ THESE INSTRUCTIONS BEFORE OPERATING THE JUICER...

The M-34 commercial grade wheatgrass juicer is a low maintenance appliance which extracts the juice from wheatgrass and other soft leafy vegetables and fruit.

Operating the machine is quite simple. Please familiarise yourself with the cleaning and maintenance procedures for trouble free juicing.

ASSEMBLING JUICER

It is important that before assembling or disassembling the juicer disconnect the plug from mains power.

At the end of each day you must disassemble the juicer to clean lubricate it. Please use the wrench (6) provided to remove the top cap (5) if it is too tight. Now remove the wing nuts (7) and the end front end will come apart for cleaning.

Thoroughly wash all parts in warm soapy water and dry. It is good practice to also use food grade petroleum jelly to lubricate the front end of the auger (3) and the white shaft seal. This will help prevent juice entering the motor unit.

Assembling the juicer is just as easy....

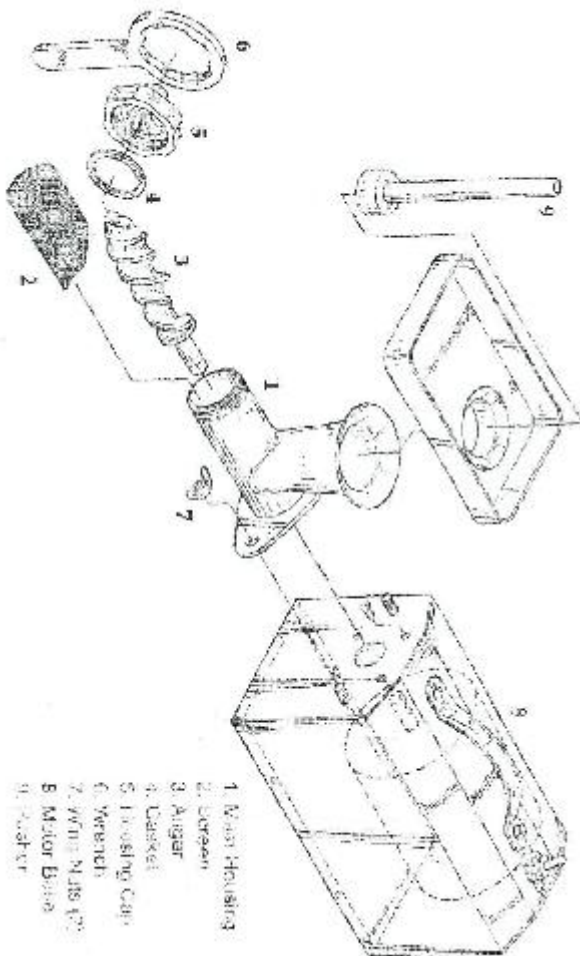

1. Insert the screen (2) tapered end first into the housing (1).
2. Insert the auger (3) into the main housing (1) and ensure that the white shaft seal is in place.
3. With the gasket inserted (4) fasten the housing (hand tighten only).
4. By hand prealign the square end of the auger (3) to the motor drive. Insert the auger into the motor and fasten together with wing nuts (7).

OPERATING JUICER

Plug your juicer into the mains power and push the switch forward (towards the main housing). Feed the grass into the opening using the pusher (9) if necessary.

When juicing wheat grass cut the grass in bunches 5 cm in diameter feeding it head first. Initially you will need to feed about 3 bunches to get the juicing process started.

Wheatgrass juice is best served immediately after juicing.

1. Main Housing
2. Screen
3. Auger
4. Gasket
5. Top Cap
6. Wrench
7. Wing Nuts
8. Motor Drive
9. Pusher
